

The Third Term English Exam

Louis Pasteur was a French scientist. He was born in 1822. He began his career as a chemist, but turned to biology and medicine later on and made many discoveries. He discovered the anti-rabies vaccine. He did many experiments on that because one of his friends Henry died from a mad dog bit in his early life. Pasteur tried the first vaccine in 1885 on a nine-years old boy Joseph Meister successfully. After this wonderful discovery, the healed people gave and sent money. They built The Pasteur Institute in Paris and then all over the world. Pasteur died in 1895.
