

Farmers

In autumn, farmers must plough their fields. They turn up the soil to prepare it for sowing. Some farmers still use horses and oxen, but most of them use tractors. Now, a tractor is quicker. It can do three furrows at the same time. Farmers put the seeds in six boxes behind the tractor, and they fall into the soil.

Part one:

Section one: Reading comprehension : (07 Pts)

A) Read the text carefully then answer the questions: (03 pts)
