

Type of Text: Narrative.**Sheikh Naimi Middle School Ouled-Djellal.****Sample Correction.****March 2008 Meeting.****Part One. 14 pts.****Cyrus Mc Cormick.**

Cyrus Mc Cormick was the first man to build a machine to cut wheat. It was called a reaper. Mc Cormick built his first machines in 1831, but farmers did not buy them at first. He didn't sell his first reaper until 1840! Farmers finally began to buy reapers. Mc Cormick wanted to build a reaper factory which had to be near farms. So, he decided to put it in a small town near Lake Michigan. The name of the town was Chicago.

In 1840s, Chicago had no railroad. The streets were dirt, and rain made the streets mud. It was difficult to travel in town. Chicago didn't seem to be a good place to start a factory. However, the factory helped the town grow. Using Mc McCormick's machines, farmers were able to plant and harvest more wheat. Chicago soon became a large city and the principal wheat market in the world.

Cyrus McCormick became very famous. His reaper and other machines are still helping farmers grow more food for hungry people.

A- Reading Comprehension. 7 points.

1) Match the dates with the corresponding events. 2 points.

1831	Mc Cormick made the first reaper.
1840	Mc Cormick sold the first reaper
