r partly immersed in a fluid is et us imagine that in a full power was a fluid in the discover, however that under that spilled over when the following the same as a fluid is actually but the following questions. 1. Choose the right answer as a fluid is actually but the fluid is actually but the fluid is actually but the following questions. 1. Choose the right answer as a fluid in the fluid is actually but the following questions. 2. Answer the following questions.	buoyed upward with a force equal to ail of water we place an iron ball the water this ball weighs only eight per ball was placed in the full pail weighs oyed up by a force equal to the weight (Freeze: ancy b) Famous discoveries ects under water and in the air is: b) different cted through the text fit in: b) Physics estions according to the text: ater?	the weight of volume of liquid it displaces. nat weighs ten pounds when weighed in air. nounds- a loss of two pounds. The volume of two pounds, which just equals the ball's loss of the water it displaces om The Book of Popular Science, v.2; p.32) c) Scientific experiments c) unknown

b) that (§3)

b) entire (§2) =

b) empty (§3) ≠

4. What or who do the underlined words refer to in the text?

5. Find in the text words that are synonyms to the following:

Find in the text words that are opposite in meaning to the following:

a) one (1§)

a) own (§1) =

a) more (§2) ≠

6. Complete the following table:

Words	experiment	success	invent	move
Adjectives				

7. Put the verbs between brackets in their correct forms.
a) If you (to mix) oxygen with hydrogen, you (to get) water. b) What (to happen) to you if you (to touch) a wire of electricity??
8. Circle the stressed syllable in the following words:
electricity - invention - electric - physical
9. Fill in the gaps with the words from the list. moves - happens - energy - flow Electricity is a type of that can build up in one place or from one place tanother. When electricity gathers in one place it is known as static electricity. But when it it called current electricity. Static electricity often when you rub things together.
10. Write a short dialogue in which you give suggestion about:
making an experiment (accept or refuse the suggestion by giving the reason -why?-)
